

These couple of pages illustrates the different styles available in the template. It is made for quickly changing to fit any need, but are based on the idea of using two matching OpenType Serif and Sans-Serif fonts.

## SUBHEADING 1

To give the best picture of the different styles and possibilities, the pages are partly filled with dummy text.

## SUBHEADING 2

There are made character styles for different types of formatting eg. *italic*, **bold** and SMALL CAPS.

## SUBHEADING 3

The styles are build up quite logical, by basing them on each others. This means that changing parameters in the default styles will affect many styles.

### 1. SUBHEADING 1 WITH NUMBERING

Sunt, utestem et que non proreici od eatquiam volorep udandaes simolor rovidis excearionse quae de mi, corrupt atiorempore dolorit ionsequae soluptat

#### 1.1. SUBHEADING 2 WITH NUMBERING

Hit di si aut molum repenam harumet dolum volut litae natiur, odipsant, optaspi cidelen isciand iae-ctur sim sedi acerum eicaepe rspiduntiatu ad quas ut explit et et excenser ibusaped.

##### 1.1.1. SUBHEADING 3 WITH NUMBERING

Subheading styles are prepared for situations where eg. a subheading 2 is placed right after a subheading 1. This will require less space above the subheading 2 to look right, as you can see below.

## SUBHEADING 1

## SUBHEADING 2 WITH NO SPACE ABOVE

## SUBHEADING 3 WITH NO SPACE ABOVE

The template also includes various styles for regular text content.

The main text are set with 11pt on a 14pt leading, and everything is locked to the baseline grid.
